-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, drawn to a method of treating skin rash resulting from enzymatic irritation to the skin comprising the administration of a plant extract having a trypsin and/or chymotrypsin activity, classified in class 424, subclass 94.64, for example.
- II. Claims 12-13 and 23-25, drawn to a method of treating perineal dermatitis comprising topical administration of composition containing a procyanidin-containing natural plant extract, wherein the plant extract has a trypsin and/or chymotrypsin inhibitory activity, classified in class 424, subclass 725 or subclass 94.64, for example.
- III. Claims 14-22, drawn to a method of preventing diaper rash, classified in class 514, subclass 865 or subclass 783.
- IV. Claim 26, drawn to a method of treating skin rash resulting from enzymatic irritation to the skin comprising the administration of a composition containing a natural plant extract having a trypsin and/or chymotrypsin inhibitory activity wherein the natural plant extract is comprised of at least one of procyanidin, catechin or epicatechin, classified in class 424, subclass 725 or subclass 94.64, for example.

Art Unit: 1654

- V. Claim 27, drawn to a composition, classified in class 424, subclass 757 or subclass 641.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the four different groups are directed to four different method of treatments.

Inventions I-IV and V are related as process of use and product. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product as claimed has been found useful in four different methods of treatment, as evidenced by the claims themselves.

Because these inventions are distinct for the reasons given above and the search required for one Group is not required for another Group, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1654

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michele Flood whose telephone number is 571-272-0964. The examiner can normally be reached on 7:00 am - 3:30 pm.
